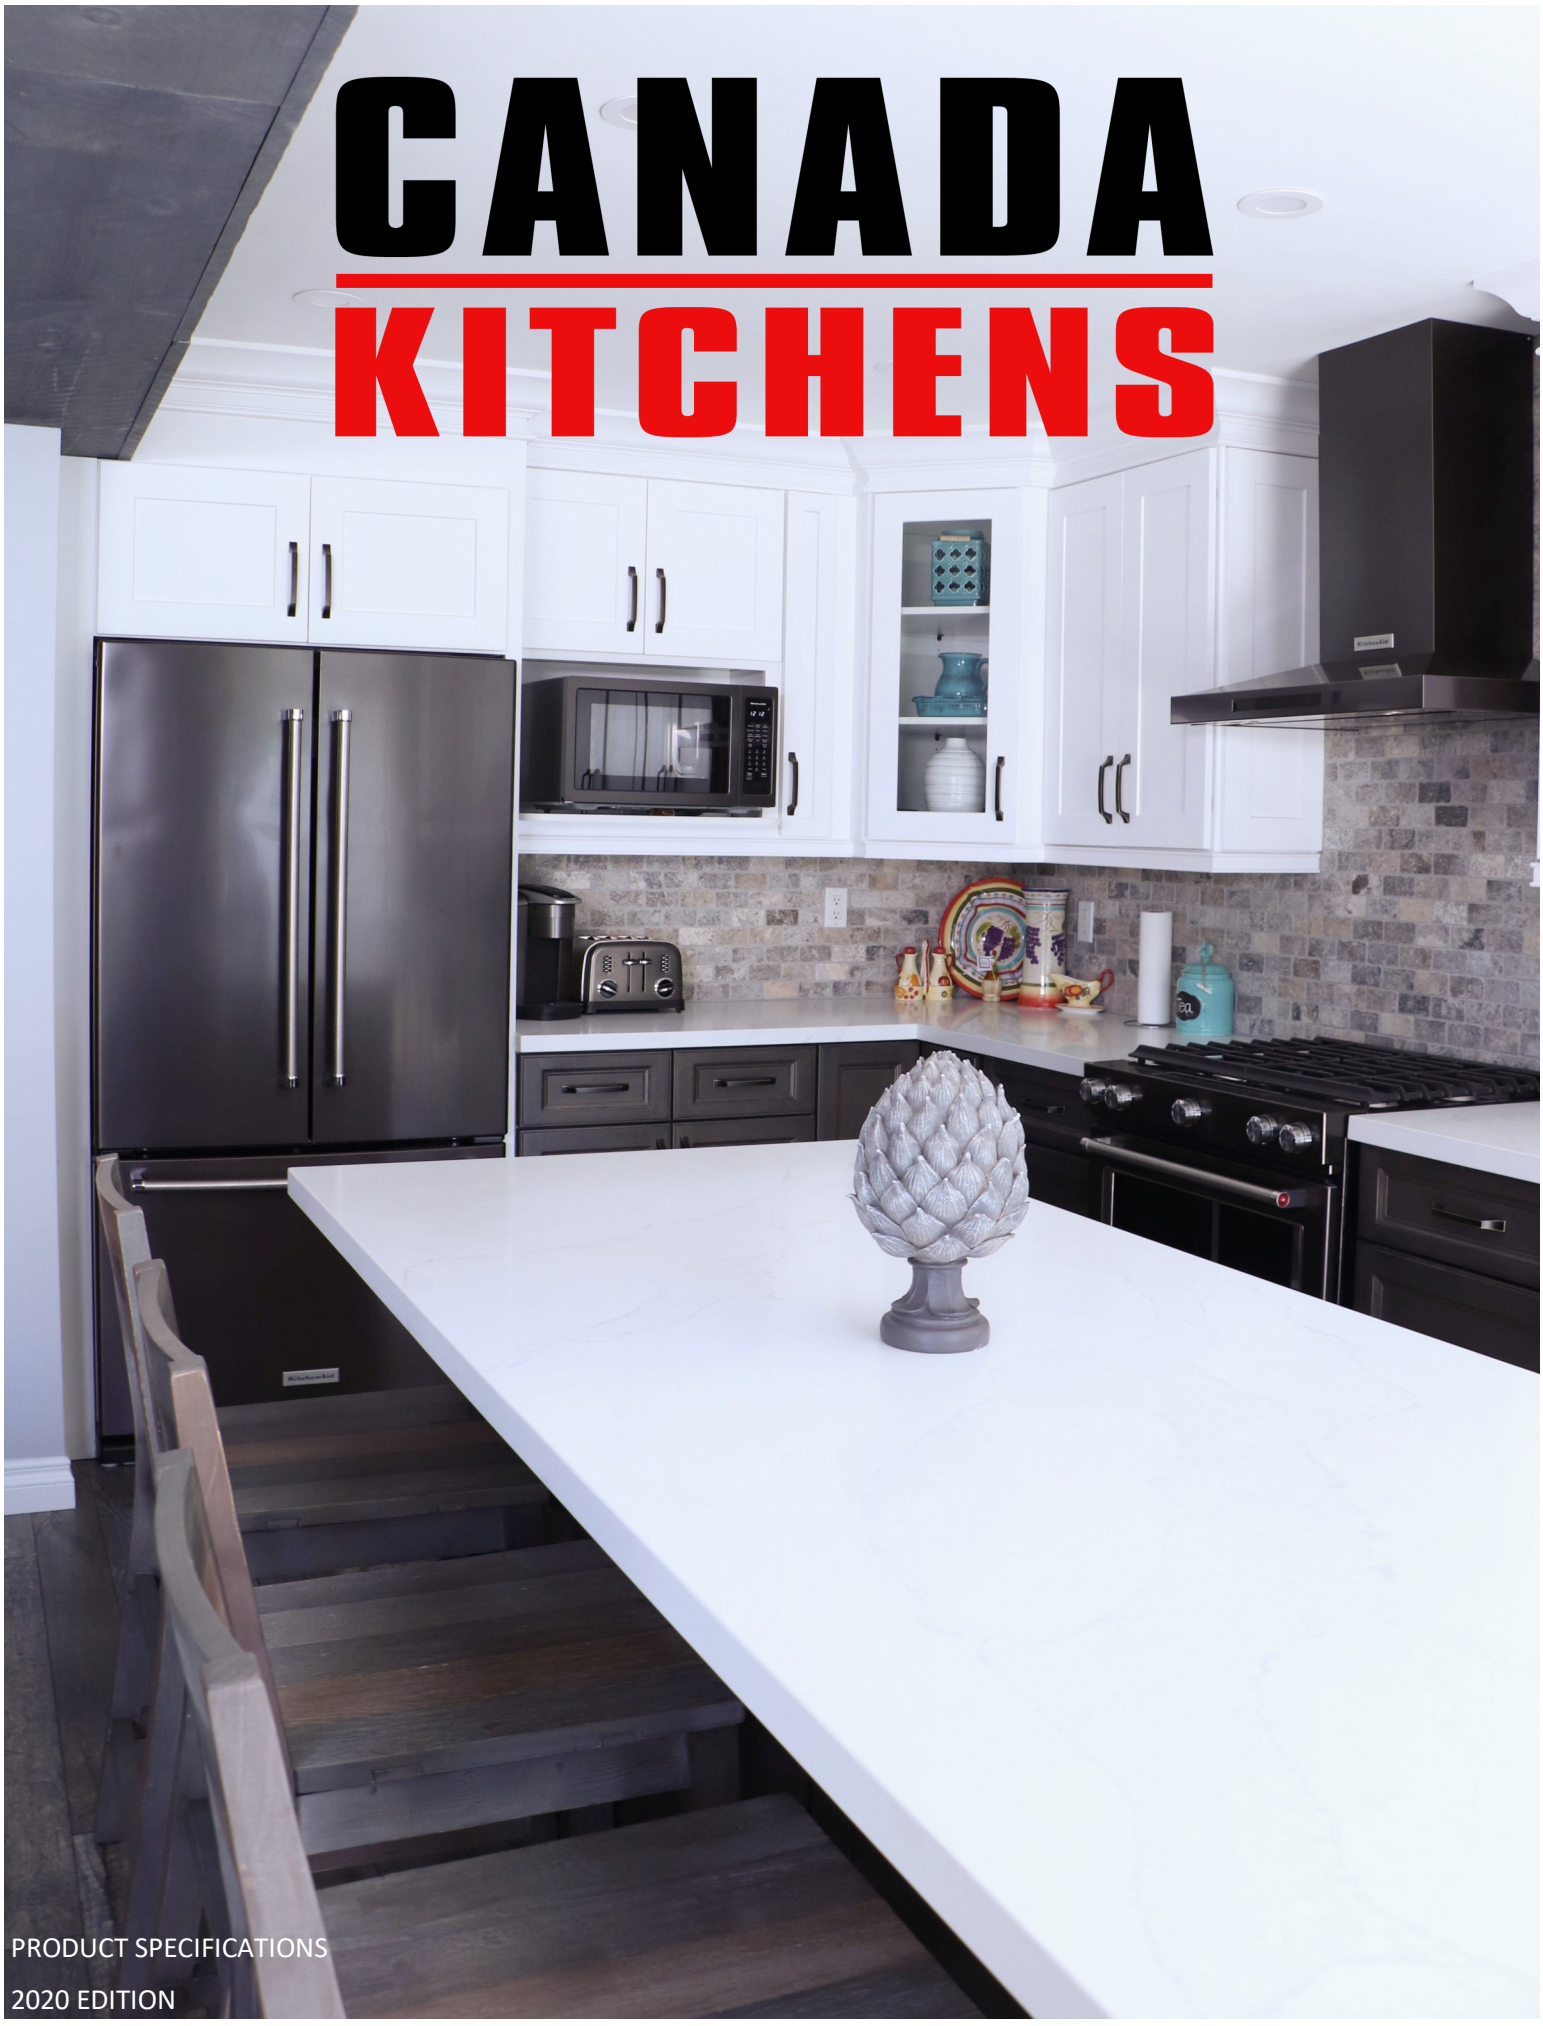
CANADA KITCHENS



PRODUCT SPECIFICATIONS

2020 EDITION

At Canada Kitchens, the fondest memories are made when gathered around the island.

Canada Kitchens believes in work-life balance. We believe in a family environment where we build strong relationships with our employees and dealers. We believe in supporting, guiding and creating opportunities for everyone.

We believe in working together to make kitchen dreams come true.

Canada Kitchens offers ready-to-assemble, semi-customizable kitchen cabinetry to our clients specific needs.

We are the manufacturer of our entire line of ready-to-assemble cabinets, we have complete control of the engineering, design and manufacturing of our product. This gives us the ability to produce products that are easy to build and made to last.

We believe in keeping *optional upgrades* as a standard, starting with soft close hinges and glides, dovetail joints, 5/8" thick AA grade plywood boxes, and solid birch doors and face frames.

CANADA KITCHENS

Commitment to Sustainability

It's the little things that citizens do. That's what will make the difference.

Our little thing is providing a good design that is sustainable.

EPA TSCA Title VI Compliant

In efforts of constantly striving to improve the quality of our products, Canada Kitchens has made a commitment to ensure that all of our MDF and Plywood products are certified under Environmental Protection Agency's (EPA) Toxic Substance Contract Act (TSCA) Title VI regulations.

EPA TSCA Title VI Compliant was established to regulate the chemical emissions produced by composite wood products. This regulation reduces the exposure to formaldehyde in the air indoors.

FSC Certified

The Forest Stewardship Council (FSC), is a non-profit organization that ensures that forestry is practiced in an environmentally responsible manner. Canada Kitchens is committed to supporting sustainable products and doing our part in contributing to the environment.

We believe in selecting the finest raw materials, ensuring consistent quality and uniformity of appearance.

At Canada Kitchens, when it comes to our cabinet finishes, we pride ourselves by using the best technology and workmanship to ensure good quality cabinetry. Our finishes consist of stained and painted options in various colours and styles.

Our Staining Process

We begin our process by selecting the finest solid birch wood.

The Birch wood is sanded until smooth using a combination of automatic sanding machines and hand detailing to ensure a smooth finish.

The application of equalizers and toners are used to balance the colour of the wood and ensure a uniform colour throughout.

Our automatic spraying machine ensures the stain is embedded deep into the cabinet; which highlights the natural grain in our Birch wood.

After this process, all stained surfaces are hand-rubbed and wiped down to remove excess stain. It is then left to air dry.

Once the stain has dried, a wood sealer is applied to provide even protection.

We then, sand the surfaces to provide a smooth and consistent surface.

Our final protective coat is applied to maximize resistance to scuffing, moisture, fading and most household chemicals.

The cabinets are now placed through a colour consistency examination where additional touch-ups are made where needed.

Our Painting Process

We begin our process by selecting the finest solid birch wood.

The Birch wood is sanded until smooth using a combination of automatic sanding machines and hand detailing to ensure a smooth finish.

The application of a clear primer is applied by an automatic paint roller and an automatic sanding machine is used to ensure an even and smooth surface of the wood.

Our first layer is a base coat which is applied by our automatic spraying machine. It is then placed through a drying machine.

The base coat is then sanded by an automatic sanding machine and is vacuumed to remove any excess dust.

We apply our first coat of paint using our automatic spraying machine and we place the cabinets through our drying machine.

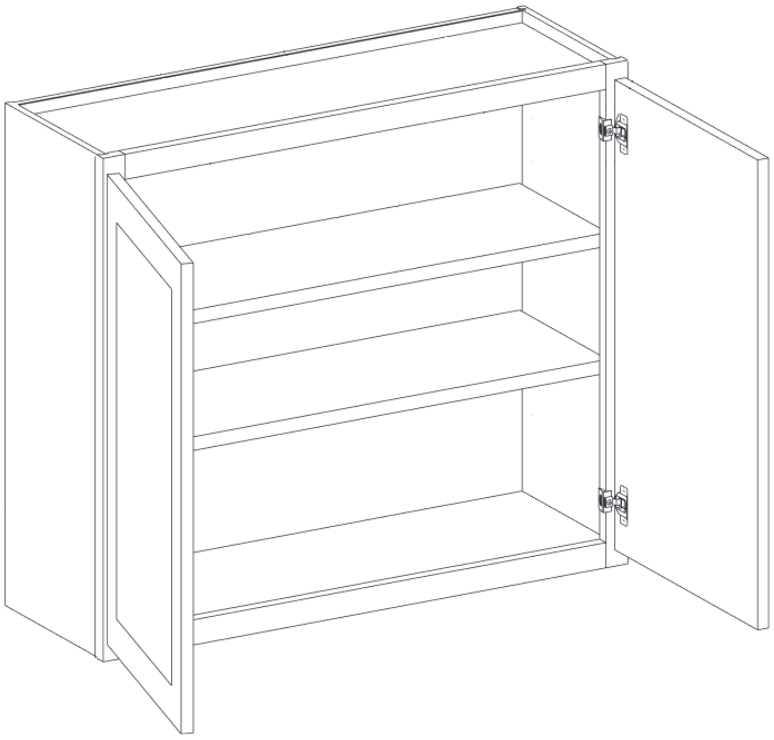
We then, sand the surfaces to provide a smooth and consistent surface.

We apply a second coat of paint on our cabinets using the same steps as the first coat.

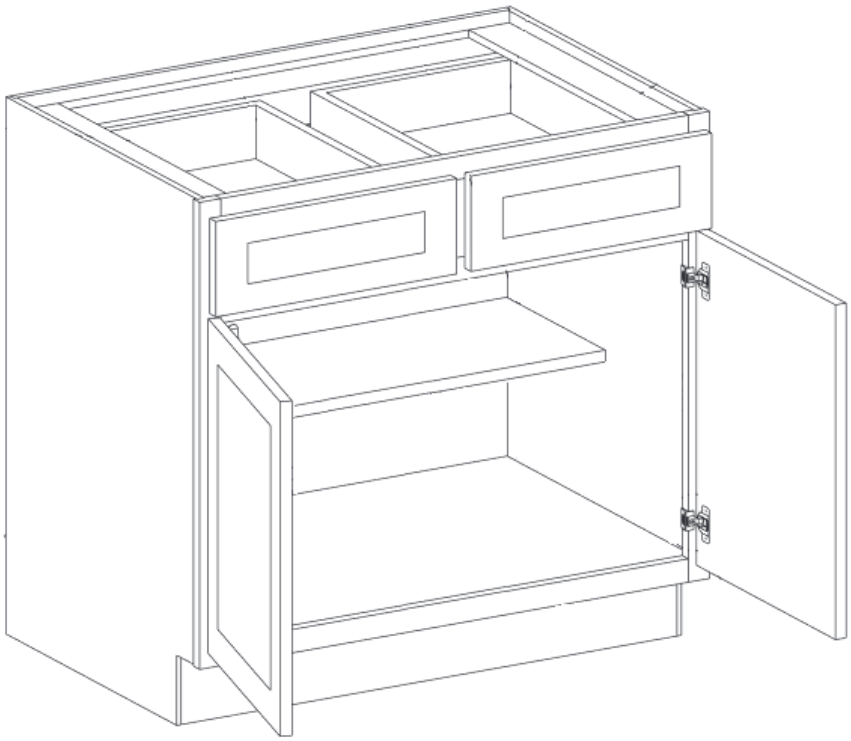
Our final protective coat is applied using the automatic spraying machine to maximize resistance to scuffing, moisture, fading and most household chemicals

The cabinets are now placed through a colour consistency examination where additional touch-ups are made where needed.

Wall Cabinet—Two doors in Shaker Style.



Base Cabinet—Two doors and two drawers in Shaker Style.



We believe in keeping *optional upgrades* as a standard.

1. PAINTED DOOR PANEL & FACE FRAME—3/4" THICK SOLID BIRCH DOOR FRAME WITH MDF CENTER, FULL OVERLAY DOOR.

Canada Kitchens believes in transparency.

Our cabinets are manufactured in our fabrication centers in Malaysia and China making it possible to ensure the best prices possible!

We use a combination of the latest technology and hands-on approaches to ensure good quality cabinets to our clients.

Our cabinets are all constructed with EPA TSCA Title VI Compliant AA Grade Ply-Wood and High Quality Medium-Density Fibreboard and they are all FSC certified.

Our cabinets are all constructed with solid wood and built to last.

We are where functionality, quality and affordability meet.

Our cabinets come in standard cabinet sizes, growing in increments of 3".

All of our base cabinets are 24" in depth and are 34 1/2" in height. Our upper cabinets are all 12" in depth and come in three standard cabinet heights—30", 36" and 42".

We have a wide variety of products from pantries, wine racks, open shelving units, stackable cabinets, glass cabinets, trims, corbels, posts, etc.

Our cabinets can be easily modified which makes them semi-customizable cabinets—this will give you the opportunity to fulfill any of your clients requests.

Vanity Drawer Base

VDB1221-3— **V**ANITY **D**RAWER **B**ASE, 12" W x 34 1/2" H x 21" D

General Information:

- ◊ Keep all cabinet surfaces dry at all times.
- ◊ Cabinetry surfaces should be dried immediately with a soft, microfiber cloth after cleaning.
- ◊ As with all solid wood products; drastic changes in temperature can be harmful to the cabinet finishes and overall structure.

Basic Cleaning:

- ◊ After installation wipe the interior and exterior of the cabinets with a soft damp cloth and dry immediately with another clean, soft cloth.
- ◊ For routine cleaning; use a soft, clean cloth dampened with warm water—If the water alone does not clean cabinets completely, mix a mild dishwasher soap with the water.
- ◊ Wipe up food spills and water spots promptly with a damp cloth or sponge and dry the surface immediately.
- ◊ For best results—use a blotting motion rather than a wiping motion to remove the substance.

Cleaning of Glass Door Inserts:

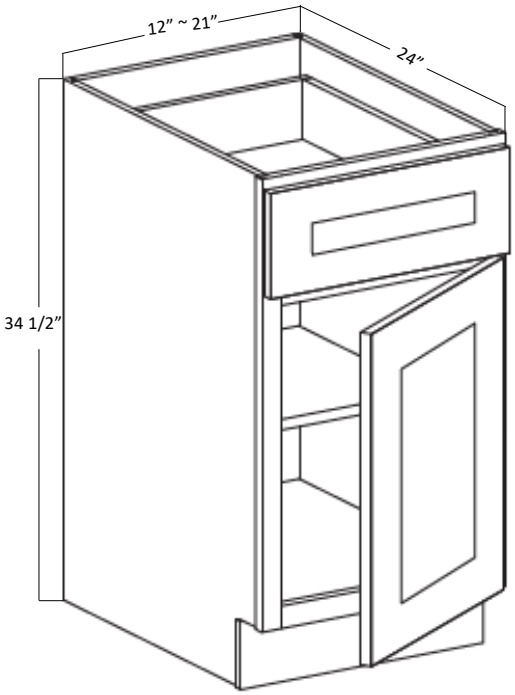
- ◊ Use an ammonia-free glass cleaner with a soft, clean microfiber cloth.
- ◊ Spray a glass cleaner on a clean microfiber cloth or paper towel.
- ◊ Avoid spraying the glass cleaner directly on the glass—this is to prevent glass cleaner running into the joints of the cabinets.

Basic Care & Things to Avoid:

- ◊ These products and ingredients can damage the cabinetry– Please avoid use of the following:
  - ◊ Scouring Pads
  - ◊ Steel Wool
  - ◊ Ammonia
  - ◊ Nail Polish Remover
  - ◊ Paint Thinners
  - ◊ Bleach
- ◊ Never leave a cloth saturated with cleaner or water on any cabinet surfaces.
- ◊ Avoid using an excessively damp cloth over exterior and interior of cabinetry.
- ◊ When using small kitchen appliances that produce heat and/or steam always pull them away from the underside of cabinetry to prevent damage to the cabinets.
- ◊ Always remember to turn on the ventilation while cooking.

BASE CABINETS

Base Cabinets With 1 Drawer & Door



Item Code	Dimensions	Weight (A)	Weight (B)
